

The ideal wheelset at the best price/quality ratio

The online store RCZ Bikeshop, a well-known website among the bikers of our country (with more than 250 leader-brands available) released for this season a captivating offer, focusing in particular on MTB wheels, which definitely deserves some more attention.

The 2015 line by RCZ for MTB wheels, consequently wider than it used to be in the past, is exclusively available on the online shop www.rczbikeshop.com, gives the possibility to please customers' needs by offering the three wheelsizes, the 26", the 27.5" and the 29" – not only are the products very reliable, their prices are very low as well. Quality is another keyword for these wheels, a fitting example is the use of the rims No Tubes ZTR Alpine and Crest, by many considered to be the best on the market. These rims are very lightweight and proposed at an incredible value.

The new RCZ wheels are also available with a 9mm front axle convertible into 15mm and the other way round: this is possible thanks to a new hub (totally replanned), in addition to the new 142x12mm rear axle.

About all, today our suggestion concerns the kit RCZ Race 27.5" V1 Disc 6 Holes (Sram XX1), which we had the opportunity to test satisfactorily during the Christmas break – a mix of high-level performance and reliability, but also lightweight and provided with new 2RS sealed bearings, but that's not all...

Perfect for a competition use (Cross Country and trail) this fine hand-built aluminium kit by RCZ, proposed at an amazing price (about 200€ for the set), seems to be really adapted to please the requirements of Italian bikers, among the most demanding and competitive in Europe.

Rims: 27.5" size, for disc – internal width 17mm/external 23mm/ depth 19mm, colour Black, freewheel with aluminium body, for 11 speed Sram XX1.

Hubs: front 24h (9-15x100mm), rear 28h (12x142mm) for 6 holes disc, colour black.

Spokes: Pillar SR2018 (24 at the front /28 at the back), colour black

Nipples: Aluminium, black

Valve: Schrader

Weight: 1670 grams

9 and 15mm adaptors for the front axle are included

Quick releases and rim-flap are not included.
